

ALFRED MANN FOUNDATION

October 19, 2006

Mr. Anthony Murfin
VP Global Sales & Marketing
Ground Zero Electrostatics, Inc
4916 26th Street West, Suite 100
Bradenton, Florida 34207

Dear Anthony,

On behalf of the Alfred Mann Foundation we would like to extend our sincere appreciation and satisfaction with our new ESD Flooring. In January of 2006, we were facing a multitude of challenges with our existing raised computer sub flooring in our production laboratory. Our work with highly sensitive electronic components and living in a dry desert region required that we upgrade the flooring in our stockroom and production lab, or risk damaging valuable components. Searches on the Internet lead us to Ground Zero Electrostatics and to your experienced staff which offered solutions and experience with our situation.

Despite the fact that Ground Zero is located in Florida and The Alfred Mann Foundation in Southern California, the communication and logistics of the projects were very efficient. The material and crews were on time which resulted in minimal disruption to our operations. We would like to specifically acknowledge the installation team of Pat McGowan and Jeff Spencer who worked professionally and put forth tremendous effort to complete a quality floor on schedule. Please extend our appreciation to Pat and Jeff.

It has been a pleasure to work with you and the staff at Ground Zero Electrostatics. We recommend your services to other organizations with similar flooring needs. The humidity level is in the single digits today with a slight breeze in the air, and we are feeling confident that our ESD risk is under control. Thank you again.

Sincerely,

A handwritten signature in blue ink that reads 'Dan Dell'.
