

## **XO-STAT CONDUCTIVE/DISSIPATIVE CARPET**

Ground Zero Electrostatics in conjunction with one of the oldest independent carpet mills in the nation is proud to introduce XO-STAT to our arsenal of electrostatic elimination flooring. XO-STAT doesn't just reduce static charge generation but actually draws the electrostatic potential to ground. Utilizing a unique combination of advanced conductive filaments blended with a solution of yarn dyed fiber (26 to 30 oz), XO-STAT is excellent for office environments or for use in sensitive electronic manufacturing (exceeding stringent specifications issued by IBM, GE, Intel, Western Digital and HP for conductivity of flooring in electronic manufacturing). Working in unison with Ground Zero, installation, adhesive options and material may be tailored to meet your precise requirements for conductivity.

With XO-STAT, protection through conductivity meets comfort and quality. Forget about static induced computer network glitches in your offices! No more scuff marks on your ESD

floors in manufacturing! This material is easy to maintain (just vacuum), and features unparalleled ergonomic comfort at a price that's competitive with many non-conductive "standard" office grade carpets.

At Ground Zero we have installed, supplied, certified and (hence) evaluated possibly every ESD Flooring material on the market. We know the pros and cons of the various materials available. XO-STAT carpet, selected by our industry experience and stringent requirements, provides consistent electrical performance, longevity, ease of installation and price versus quality unmatched in the industry. XO-STAT lays to rest the myth that carpet cannot provide the level of protection necessary in electronic manufacturing, office environments, command centers and labs.

### **BENEFITS**

- ✱ Exceeds Specs for IBM, Western Digital and HP (ESD control, manufacturing environments).
- ✱ Economical protection for offices with sensitive electronics and Networking.
- ✱ Low Maintenance and pleasing ergonomic comfort to boost productivity.
- ✱ Beautiful warm textures and colors, with excellent sound absorption qualities.

### **WARRANTY**

- ✱ Lifetime on Fiber Wear
- ✱ Lifetime on Electrical Performance
- ✱ Lifetime on Stain Removal
- ✱ Lifetime on Colorfastness (UV Lighting & Atmospheric Contaminants)
- ✱ Lifetime on Static Control & ESD Properties
- ✱ Lifetime Warranty on X-0Stat carpeting against static-induced malfunctions of electronic equipment when installed throughout an entire operating area.

### SPECIFICATIONS

#### SIZES AVAILABLE:

12' Broadloom

#### ELECTRICAL PROPERTIES:

ASTM 150 / EOS / ESD S4.1

PTP:  $2.5 \times 10^8$  to  $10^9$

RTG:  $2.5 \times 10^8$  to  $10^9$

#### STATIC DECAY:

Conditioning: 50% RH +/- 2% @ 23°C +/- 1°C for 24 Hours.

Test conducted @: 50% RH +/- 2% @ 23°C +/- 1°C.

Test results = Time, seconds to decay to 10% of initial charge.

Results, <0.01 second
