

Ground Zero Electrostatics FIELD SERVICE KIT

FIELD SERVICE KIT

This Field Service Kit provides a complete portable static safe workstation for personnel working with electronics in the field. To stop static electricity from damaging electronic cards, a static safe work area is essential for Field Service Technicians performing in-field repair or installation of cards. Ground Zero's field service kit is used by technicians in telecommunications, computer, industrial controls, and business equipment service applications. The entire kit folds to fit into most tool cases. Custom mat printing is available.

Meets ESD-S20.20
Requirements for Portable
Workstations

Guidelines for Field Service Static Safety

Always place electronic parts on the grounded mat. (not on equipment, carpet, or packaging)

Keep all spares (even damaged parts) in static shield bags.

Keep static accumulators like plastic, Styrofoam cups, and synthetic clothing away from electronic parts.

When finished with the field service kit, place the strap and cords into a pocket and fold the kit around the pocket.
