

## Ground Zero Electrostatics ION-8000 Ionization Air Gun

### ION-8000 Ionization Air Gun

The ION-8000 Ionization Air Gun puts high pressure low volume ionized air at your fingertips, by inductively coupling a high intensity ionizing nozzle to a durable lightweight aluminum air gun. The ION-8000 makes it easy to solve static electricity problems by delivering ionization to hard to reach spots or across irregular areas.

An ideal cleaning tool, the ION-8000 first neutralizes the static electricity holding contaminants on small parts and then scours the surface clean with a blast of high pressure air. A real problem solver in applications where cleanliness is critical.

- The standard H.V. cable between the gun and the power supply is 10 feet long.
- Every ION-8000 incorporates 1/4 inch NPT Air Connection to accommodate the compressed air coupling of your choice.
- RFI Shielded Cable is available upon request.

#### Specifications:

Air Supply: 30 P.S.I. ( 80 P.S.I. Max.) Clean, Dry Air  
Air Delivery: On / Off with Trigger Control  
Air Gun Body: Plastic  
Ionizing Body: Plastic with an Aluminum Tip  
Recommended  
Power Supply: ION- 8000  
Power Cable: 10 feet between Power

#### Supply and Gun

Input Power: 115 VAC 50/60 HZ. (others upon request)
