

Ground Zero Electrostatics DISPOSABLE 3-LAYER FABRIC

DISPOSABLE 3-LAYER FABRIC

Our disposable aprons, labcoats, and sleeves are made with a three-layer fabric that is ideal for many situations where a dry particulate barrier and repellency are needed. They provide an excellent barrier against water based liquids and is resistant to light chemical splash.

Worker comfort is greatly increased because it is lightweight, soft and breathable. It offers improved strength, splash and particulate resistance against many workplace hazards.

Also, it is treated with an anti-static agent. When a durable, comfortable garment is needed, our disposable site wear is exactly what you need.

Applications: Nuclear power plants, asbestos, food industry, paint spraying, fiberglass handling, lab/biohazards, cleanroom, medical, general cleaning, metal surface treating, pharmaceutical industry, nontoxic liquid handling.

Measurements
Chest.....68.58cm
Sleeve
(outseam from center back)....88.90cm
Neck.....25.40cm

Ground Zero Electrostatics DISPOSABLE 3-LAYER FABRIC

SPECIFICATIONS FOR SMS FABRIC

Description

With SMS fabric you get increased strength, uniformity, porosity consistency, filtration, and absorbency. SMS is a lighter, more durable and efficient fabric. SMS fabrics are used mainly because of their high tensile strength, and tear and abrasion resistance, due to the high barrier properties of the meltblown layer.

Specifications

Material:

Spunbonded Meltblown Spunbonded fabric

Features:

- Anti-static treated material
- Resistant to most liquids
- Hydrostatic water resistance up to 20.8 inches

Particle Protection

90% efficiency against particles between .5 and 1 micron in size.

Splash & Chemical Protection

Use this garment only in light to moderate contact in either splash or chemical areas.

Benefits

Breathability
Superior Quality
Comfort
Low Cost
